

2013 NAVIGATION/MULTIMEDIA Receiver Firmware Update Guide

Introduction

- This document describes the procedure and precautions for upgrading the 2013 NAVIGATION/MULTIMEDIA receiver firmware.
- If an error occurs while you are updating the firmware, the 2013 NAVIGATION/MULTIMEDIA receiver may become unusable. Be sure to read the following procedure and precautions carefully before updating the firmware.

Target Models

This updater can be used to update the firmware of the following models.

DNX4230TR

Target Firmware

This updater can be used to update the following firmware version:

Ver 120/11.0.2 or earlier

To check the firmware version, refer to "Checking the Firmware Version" below for information on how to check the firmware version. By executing this updater, the firmware version will become "V121/11.0.2".

Creating the Update Media

Create the update media on your PC.

1. Download the Updates from the Web site.

For USB memory-1

2. Decompress the downloaded file ("DAB_V121.zip").
3. Copy the decompressed file (13_dab_module_V121.bin) to the top of hierarchy in **USB memory-1**.

For USB memory-2

4. Decompress the downloaded file ("DAB_C11.0.2.zip").
5. Copy the decompressed file ("13_dab_cayman1_16.bin" and "13_dab_cayman2_11_0_2.bin") to the top of hierarchy in **USB memory-2**.

IMPORTANT INFORMATION

- Prepare two USB memories. If you can prepare only one USB memory, copy the 1st file and update firmware. And then repeat this procedure for 2nd file. If you copy 2 files in one USB memory, it may cause error and fail in update.
- If the error message appears, delete "13_dab_cayman1_16.bin" and "13_dab_cayman2_11_0_2.bin" file from the USB memory-1 and then update the firmware.

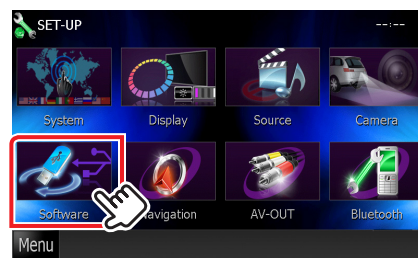

- USB memory is recommended as the update media.
- Do not copy the updater to a device containing audio files. Blank USB memory is highly recommended.
- Update cannot be performed if it is copied inside a folder.
- If the updater file name is changed, update cannot be performed.

Checking the Firmware Version

1. Press the [Menu]. Press the [SET-UP] icon to display the Setup Menu screen.

2. Press the [Software] to display the Software Information screen.

3. Check the version.

Updating the Program

1. Connect the **USB memory-1**.
2. When an audio file is played or "No Media File" is displayed, press the [Menu] button and select "STANDBY" (standby state).
3. Press the [SETUP] icon to display the Setup Menu screen.
4. Press the [Software] to display the Software Information screen.
5. Press the [Update] to start updating. (USB memory-1: It takes about 2 minutes, USB memory-2: It takes about 10 minutes)

Caution: The screen may go blank for a few seconds. Do not unplug the USB memory or Power Off the unit during the Update Procedure.

6. Once the "Update completed" screen is displayed, remove the USB memory.
7. Press and hold <MENU> to turn off the power.
8. Press <MENU>.
9. Connect the **USB memory-2** and repeat from 2 to 8.
10. Check that the firmware version is updated, by referring to "Checking the Firmware Version". When "V121/11.0.2" is displayed, the firmware version is updated successfully.

Precautions

- Update cannot be performed with other media.
- Be sure to park the vehicle in a safe place before updating. Keep the engine running in order to prevent battery from running out.
- Do not turn off the engine or Navigation/Multimedia receiver power while updating. Update cannot be performed correctly and the Navigation/Multimedia receiver may become unusable.
